

Parts List

A CPU Water Block

- A-1 BPTA-CPUMS-V2-SKA1 pc
- A-2 Backplane assembly.....1 set

B Fittings

- B-1 BPTA-DOTFH16224 pcs
- B-2 TA-F61.....2 pcs
- B-3 BPTA-F95.....2 pcs
- B-4 BP-RIGOS5.....2 pcs
- B-5 TA-F602 pcs
- B-6 TA-F402 pcs

C Accessory

- C-1 Hard tube2 pcs
- C-2 Fitting + soft tube1 pc
- C-3 CPU set

SCM3FL20
SPRING
SCM3F6
1mm Spacer
Back Pad
Paste Pad
Metal Backplane
M3x32mm Screw

C

C-1 Hard Tube

※ The allowable variance in tube length is $\pm 2\text{mm}$

C-2 Fitting + soft tube

I. AMD Motherboard system

DRGB PIN on ❶ Motherboard **or** ❷ other equipment.

DRGB PIN on ❶ Motherboard **or** ❷ other equipment.

➡ BPTA-RFCHUB

Motherboard

Fan and DRGB RF Remote
Controller Hub (Not included)

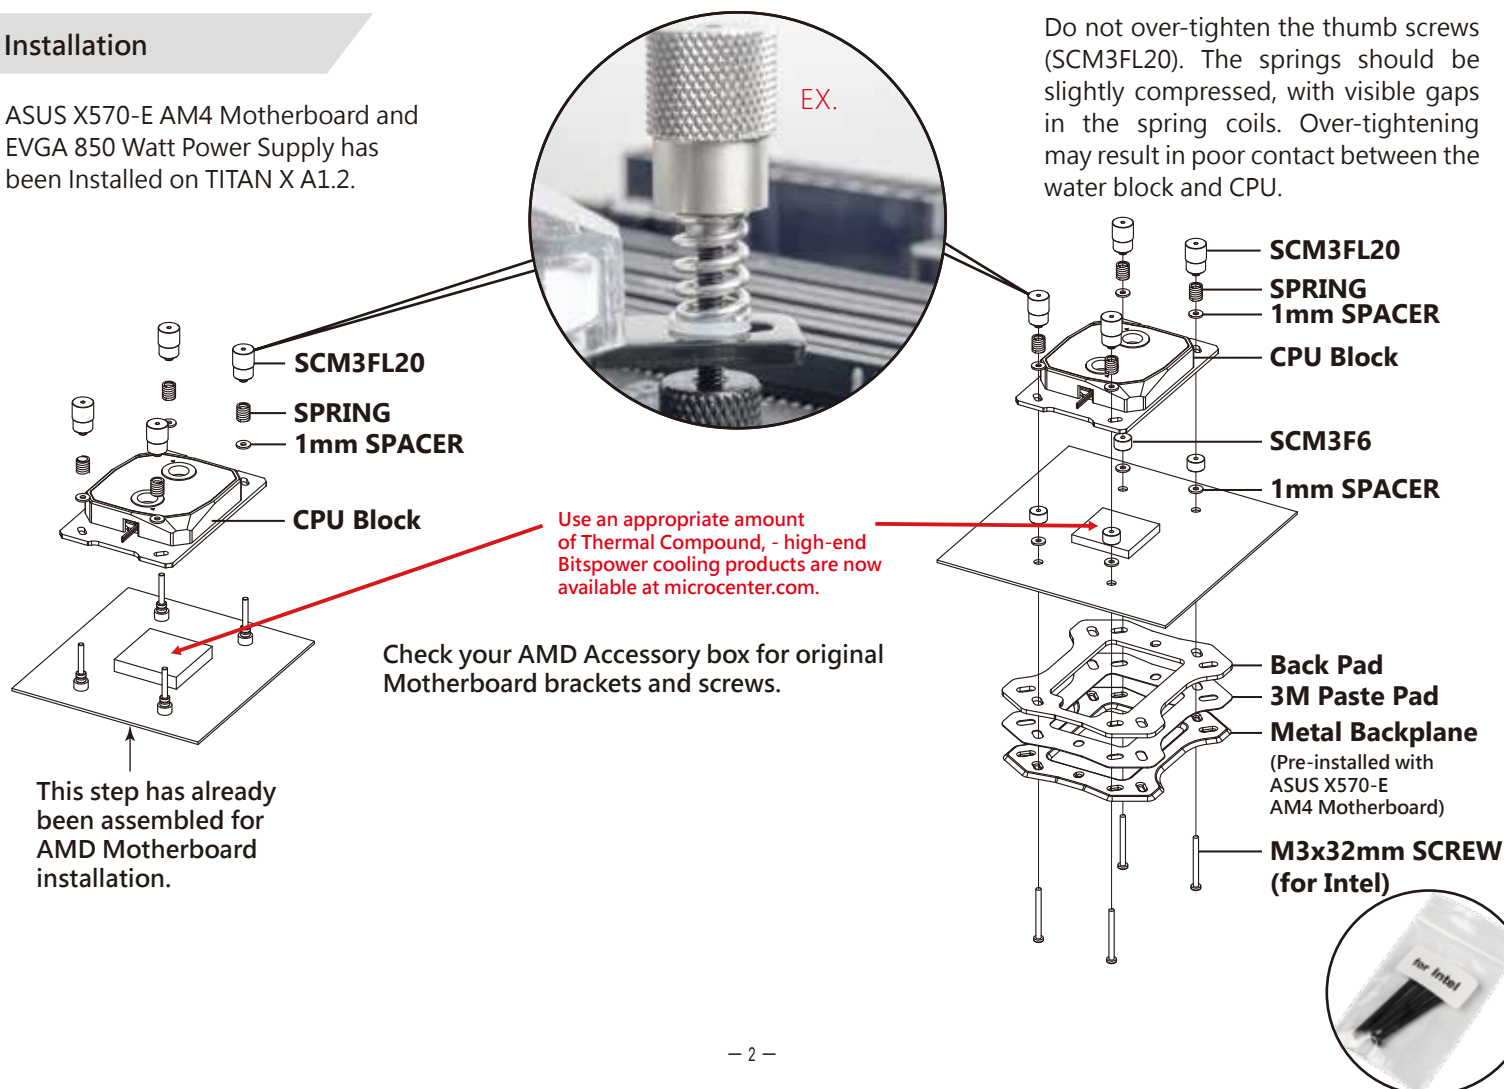

AMD SOCKET 939 / 754 / 940
AMD SOCKET AM4
AMD SOCKET AM3 / AM3+
AMD SOCKET AM2 / AM2+
AMD SOCKET FM1 / FM2+

The CPU water block has a DRGB cable, which can be connected to the DRGB extension cable of the radiator fans.

Installation

ASUS X570-E AM4 Motherboard and
EVGA 850 Watt Power Supply has
been Installed on TITAN X A1.2.

II. AMD Chipset Installation

How to install tubes for CPU

Installation 1

Motherboard			CPU	TUBE	
	Model	Brand			
1	ROG STRIX B450F GAMNG ATX	ASUS	AMD	48x263 mm	48x263 mm
2	PRIME X470-PRO AM4	ASUS			
3	TUF GAMING X570-PLUS WIFI	ASUS			
4	ROG STRIX X570-E GAMNG	ASUS			

Installation 2

Motherboard			CPU	TUBE	
	Model	Brand			
1	B450 TOMAHAWK AM4 ATX	MSI	AMD	48x263 mm	48x263 mm
2	B450 AORUS PRO WIFI AM4	GIGABYTE			
3	X570 AORUS ELITE WIFI	GIGABYTE			
4	TUF GAMING X570-PLUS WIFI	ASUS			

Installation 3

Motherboard			CPU	TUBE	
	Model	Brand			
1	MAG B550 TOMAHAWK	MSI	AMD	48x263 mm	48x263 mm

Pour the coolant into the reservoir via the water filling hole. Once the reservoir is 90% full, turn on the power supply for the pump to run and let the air exit the loop. Turn off the power supply when the reservoir is near empty. Repeat until all the air has exited the loop.

Notice : Do not turn on the pump if the reservoir is empty.

⚠ Bitspower recommends that consumers add the Bitspower coolant or purified water for their water-cooling liquid. If the consumer chooses different water-cooling liquids , the resulting impurities may cause peeling of the coating on some of the hardware, water channels blockage by built-up residue, improper operation of the water pump, water tank tube breakage, and o-rings deformation leading to leakage. Any issues related to the use of inappropriate water-cooling liquid will be the responsibility of the consumer.

⚠ In order to make the internal circulation of the water cooling system cleaner, and avoid the pump stuck by the precipitate, we advise you to rinse the water cooling system with distilled water in several times until the excluded water is clean.

III. BPTA-O11D-AK

backplate / control panel / top cover

BPTA-EFW

It is recommended to install the water-exhaust fitting at the lowest point of the water cooling system.

Step 1

Unscrew the top of the water-exhaust fitting.

Step 2

Replace with the water-exhaust part. When screwing in the part, water will start to discharge, it is recommended to connect tubing beforehand to control the water outflow.

Pump Spec.
Rated voltage : 12V DC
Power consumption : 8.4W
Maximum flow : 460±15%L/h
Noise : ≤24dBA
PWM : Yes
MTBF : ≤15,000 hours
Warranty : 2 years

Notice

Before filling in the water, please make sure all the components are installed correctly. To prevent any leakage which may damage the PC components, please perform a 24-hour leaking test with only the pump connected to the power supply.

Bitpower reserves the right to change the product design and interpretations. These are subject to change without notice. Product colors and accessories are based on the actual product.

When using leak tester on water cooling loop, in order to avoid product damage due to excessive pressure, the input pressure should not exceed 0.5kg/cm² (Bar). If the product is damaged due to excessive pressure, it will be borne by the customer. Forbidden to use the leak tester when there is water in the loop or the pump is running.

Bitpower requires to use of distilled or pure water or Bitpower Pellucid Coolant as the water-cooling liquid. Also, the consumer can add Bitpower Dye to Pellucid Coolant for the color requirement. But please do not add any biocide by yourself. If the consumer chooses different water-cooling liquids, the resulting impurities may cause peeling off the coating on some of the hardware, water channels blockage by built-up residue, improper operation of the water pump, water tank tube breakage, and O-rings deformation or loss sealing leading to leakage. Any issues related to the use of inappropriate water-cooling liquid will be the responsibility of the consumer.

Do not turn on the pump if the reservoir is empty.
